

Basic features

Tempered glass

Tempered glass is used in the production, which is characterized by increased strength and safety in case of accidental destruction.

High Temperature Resistance

Our In-Wall TVs were tested in a laboratory stove and also in real Saunas, they can work stable at temperatures up to 80 Celcius (176 Fahrenheit).

Waterproof TV structure

Built-in TV is protected from water according to the IPx4 standard; it can be used in wet areas such as bathroom, pool, jacuzzi, etc.

Ultra Bright Screen

The use of such a screen provides a bright picture for a mirror TV.

Waterproof remote control

The remote control can be used with wet hands and washed under the tap.

Easy to wash

The TV does not require special care; it can be washed like a regular mirror.

Android TV

The TV runs on Android OS, which allows you to go online, download apps from Google Play.

Full HD/ 4K IPS LED

The matrix is made using IPS technology and provides wide viewing angles. Thanks to this, you can enjoy a high-resolution image.

Integrated vibration speakers

Vibration speakers reproduce high-quality sound through the glass, while there are no holes on the front surface.

TV system

The TV is equipped with built-in digital and analogue tuners, and you can also watch videos from a USB flash drive or HDD.
